SUMMARY

Senior Software Engineer with 10+ years of experience in the U.S. tech market, specializing in high-performance full-stack development. Migrated legacy PHP systems to modern Laravel/React stacks, improving productivity and system reliability. Managed the full project lifecycle (SDLC) for 10+ major implementations, maintaining high client retention and reliability.

WORK EXPERIENCE

Nicely Done Enterprises, LLC | FL, United State

Senior Software Engineer

Oct 2022 - Present

- Architected a high-concurrency enterprise platform using Laravel 10 and React, driving a 30% increase in team productivity by leveraging Laravel's ecosystem and best practices.
- Championed team code quality initiative, raising average code coverage from 65% to 90% and decreased production bugs reported by 35% within six months through rigorous code reviews.
- Implemented Laravel Horizon with Redis for background job management, improving job processing times by 30%.
- Owned frontend architecture and led the design of a reusable React component library, reducing frontend development time by 30% across multiple product teams.
- Drove cross-functional collaboration with product and compliance teams, developing solutions to fix the three biggest causes of crashes and increased application stability by 25%.
- Optimized database queries and backend performance in Laravel, achieving a 40% reduction in response times for large-scale datasets.

Amazon | NC, United State

Senior Software Engineer

Apr 2022- Oct 2022

- Guarded globally accessible consumer domains by maintaining mission-critical backend services, ensuring a high-availability environment and supporting millions of concurrent requests, resulting in zero downtime.
- Developed critical components for a high-throughput distributed system using Java and AWS, improving system uptime to 99.99% and supporting millions of concurrent requests.
- Improved system uptime to 99.98% by performing rigorous code reviews, and improved monitoring/alerting, ensuring reliable service delivery for millions of users and global consumer domains.

Computer Audio Inc | NC, United State

Full Stack Engineer

Jan 2014 - Mar 2022

- Spearheaded the development of real-time audio processing pipelines using Python and optimized API response times by 60%, enhancing user experience.
- Took ownership of end-to-end feature development, from requirements gathering and architecture to deployment and production support.
- Acted as a senior mentor for junior and mid-level engineers, coaching 8+ developers on TDD, clean architecture, debugging strategies, and performance optimization.
- Instituted mandatory documentation and code review policies for all new features, resulting in findings to fix the three biggest causes of crashes, and a 15% bug reduction.

Dowd Technology Group | Wilmington, NC

Software Engineer

Apr 2012 - Dec 2013

- Delivered custom enterprise software solutions to a diverse set of regional clients across healthcare, logistics, and professional services, managing the entire SDLC for 10+ projects.
- Engineered full-stack applications using modern Javascript frameworks, and integrated REST APIs and legacy systems; reduced application latency by 25% and improved code test coverage to 85%.
- Managed the full software development lifecycle (SDLC) for 10+ major projects, including requirements analysis, implementation, testing, deployment, and client support.
- Decreased production support tickets by 25% by identifying and fixing the three biggest causes of crashes, leading to improved application uptime and enhanced user satisfaction.

CORE SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Java, SQL, HTML5, CSS3.

Frontend: React, Next.js, Redux, Tailwind CSS, Material UI.

Backend: Laravel (Eloquent, Horizon), NestJS, Node.js, Django, RESTful APIs.

DevOps: AWS (Lambda, S3, EC2, RDS), Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins)

Databases: PostgreSQL, MongoDB, Redis, MySQL

Tools: Git, Jira, Jest, Cypress, Agile/Scrum

EDUCATION

University of North Carolina Wilmington

Sep 2006 – Apr 2012

Bachelor's Degree in Computer Science
